

PIX-Base

Mounting Accessory for the PIX-E Series

The PIX-Base expands the use of PIX-E Series recording monitors beyond camera-mount applications, such as rental and staging for live events.

Each base holds one monitor—with or without a PIX-LR—and may be positioned at variable heights or angles for the best possible view of the monitor's IPS LCD.

PIX-Bases may be placed on or mounted to any smooth surface, and multiple bases can be linked side-by-side for ultimate versatility.

Included:

- PIX-Base
- Hex key (Allen wrench)

Features

The PIX-Base mounting accessory is made from durable metal with an anodized finish and rubber grips underneath to prevent sliding or movement on a surface. Other features include:

- ¼-inch, 20-thread screw with thumb wheel for mounting.
- 7-inch hook and loop strap to secure cables
- Bubble level
- Adjustable to variable heights & angles
- Collapsible for easy transport
- Interlock design for multi-base linking
- Mounting holes for more permanent installations
